Awesome frontend libraries CSS Loaders

Mehrshad Hekmatara

Introduction

css-loaders.com is an extensive online resource offering over 600 pure CSS loading animations, all created with single-element HTML—typically just a `<div class="loader"></div>`. Each loader is easily reusable: simply click on one to instantly copy its CSS and paste it into your project. The library includes a diverse range of styles such as dots, bars, spinners, shapes, loops, waves, and 3D animations—offering a rich selection for any UI loading need.
